

## WRIST SIZER

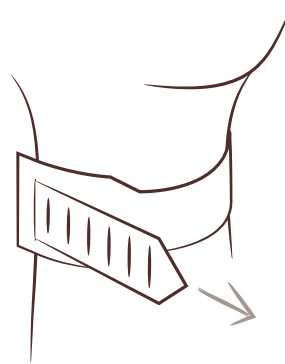

To ensure your new watch is a perfect fit when it arrives, be sure to use our wrist sizer. Make sure you first enter your printer settings and change the "page scaling" option to "none". Then print this page on a sheet of 8 1/2" X 11" paper.

### HOW TO USE:

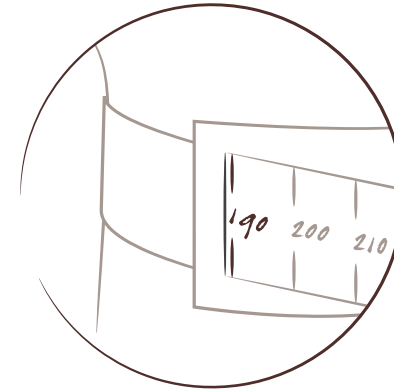

1

Cut out the Baume & Mercier Wrist Sizer along the dotted lines. Cut a slit where "cut here" is indicated.

2

Make sure the number increments are facing outwards. Insert the pointed end of the Wrist Sizer through the slit. Slide your hand into the Wrist Sizer and pull on the pointed end until it sits on your wrist as your watch would.

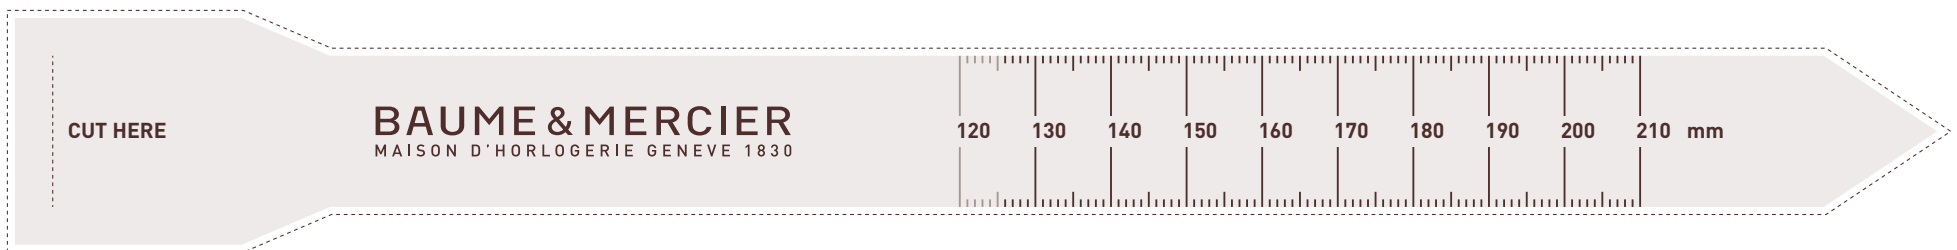

3

The number that is visible along the edges of the slit opening is your desired wrist size.

**Please note:**

This page must be printed at 100%. Do not resize or scale to fit. Use a ruler here to confirm accuracy.

**You can also:**

- Use a tape measure: Please make sure to use the metric scale (mm).
- Use a piece of string: Measure your wrist using a piece of string, then determine its length with a ruler, using the metric scale (mm).

Please note that the Baume & Mercier Wrist Sizer is an indicative guide only and therefore may not be an exact measure.
